

2nd Circular of
The Twelfth Korea-Japan Workshop on
Science and Technology in Ironmaking and Steelmaking
November 2-4, 2017
Yeosu, Korea
Organized by the Korean Institute of Metals and Materials, KIM

OBJECTIVE

The Workshop is intended to bring together scientists and engineers from Korea and Japan to have an insight into the latest developments in science and technologies in ironmaking and steelmaking, and provides a forum for exchange of ideas and opinions in the area of innovative, creative and challenging processes.

THEME

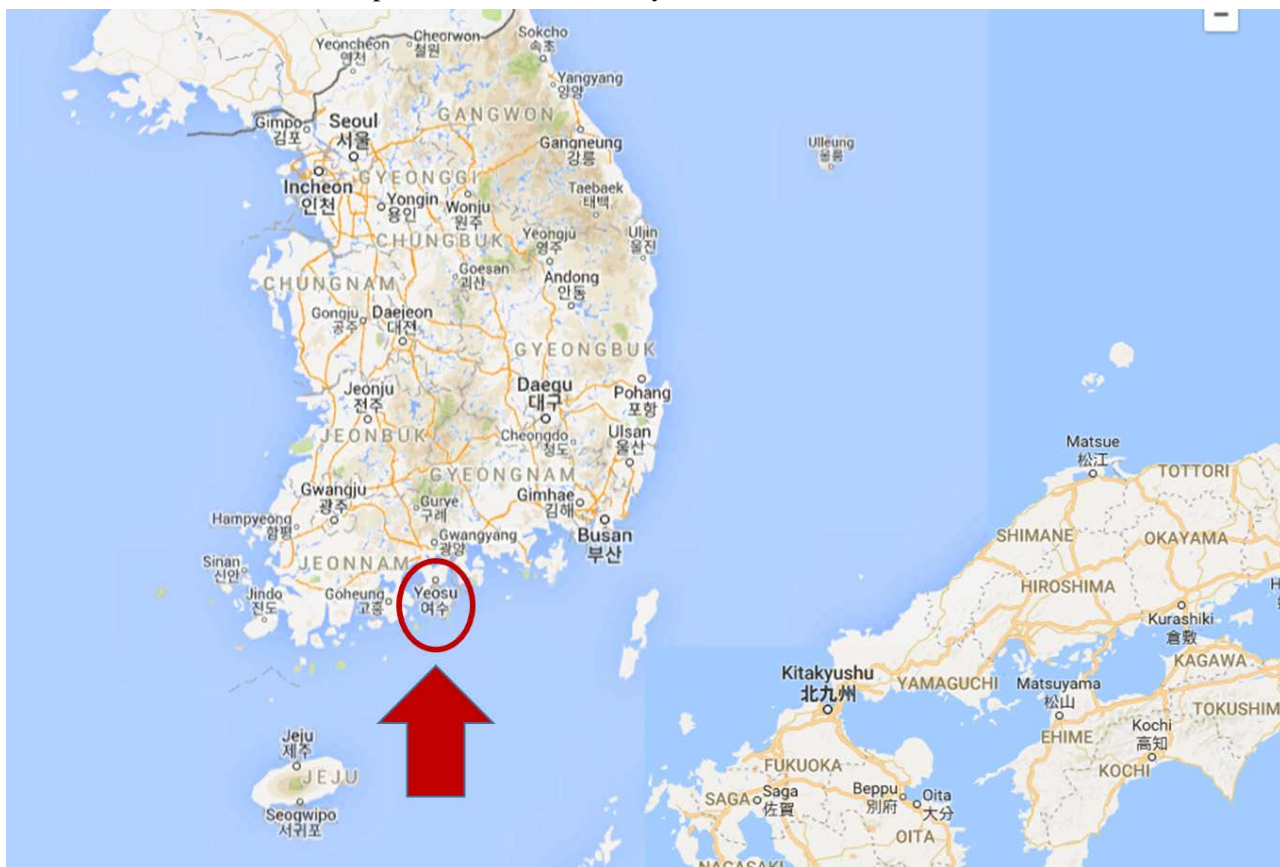

The theme of the workshop covers a broad spectrum in relation to ironmaking and steelmaking. As the workshop emphasizes the exchange of ideas and cross-fertilization among participants, it is encouraged not only to present a completed work, but also to bring up ideas which are not proved, but challenging, ongoing works which seek a peer advice, and technical or theoretical difficulties encountered during a particular research in progress.
